

Decentralization & Nullification:

We need political decentralization & nullification, because significant power in the hands of limited people always leads to corruption and cruelty. The federal government is way too powerful, ignoring the constitution, and this path must be reversed. Your state, your county, your city, your community, your family, and you know infinitely better what is best for you and your loved ones. Abolish the CIA, ATF, FBI, HUD, USDE, DOT, the unelected deep state, and End the Fed.

I would also encourage freedom loving people to run for local office. Strong, freedom and liberty minded local sheriffs for example, can have significant impact on our daily freedoms. Unconstitutional and immoral laws should be nullified, and your local sheriff has this ability.
